

## Parent Journal Entry #1:

### Objective:

1. Student will reinforce what is being learned in class about acceleration.
2. Student will gain confidence in their knowledge of motion.
3. Parents will know what is being taught how their student is doing with the subject matter.

### Procedure:

1. Student sets up a time to teach parents what they are learning in class (30 minutes).
2. Student and parent prepare to have fun!
3. Students ask anticipatory question of parent.
4. Student asks parent to write down the above question and their response. Student then explains the correctness of the parent response and further explains the concept being taught.
5. Parent should take notes on what is being taught. **ASK QUESTIONS PARENTS!**
6. Student explains this concept as well as another graphically. (keep taking notes parents)
7. Student gives parent a 3 question quiz and corrects.
8. Both student and parent write a reflection on the lesson.
