

Medication Recall

Recently, Strides Pharma Inc has issued a voluntary recall of their Children's Ibuprofen Oral Suspension 100 mg per 5 mL, 4 FL OZ (120 mL) bottle. The reason for the recall was for the presence of foreign substance; a gel-like mass and black particles in the product. This is a class II recall which indicates the product may cause temporary, medically reversible health consequences. It is the most common type of recall, addressing risks lower than immediate death, but still serious. Please check your medication at home, if it matches the information listed below, please stop using immediately.

Berry flavored solution; Lot #s: 7261973A; 7261974A; Expiration date: January 2027

Health Spotlight

Seasonal Allergy Awareness:

On high pollen days, keep windows closed, use air purifiers, and consider showering at night to prevent pollen from spreading to bedding.
